

Eventbrite Extension

This is Eventbrite extension using for importing Events and attendees from Eventbrite to ZOHO CRM. By default, a scheduler code executes automatically after every 2 hours that is fetching events and attendees from Eventbrite to Zoho CRM, you just need to install and authenticate Eventbrite account with Zoho CRM. First time on installing of Eventbrite extension all of events will be synced to ZOHO CRM activities module and attendees will be created in contact module. It will also check new created and updated events in Eventbrite and sync to ZOHO CRM.

How to install Extension?

Click this link in same browser where you already logged in your Zoho CRM account:

<https://crm.zoho.com/market/installPrivatePlugin.do?portalName=projects&nameSpace=eventbrite1&versionIndex=3838564000000281005>

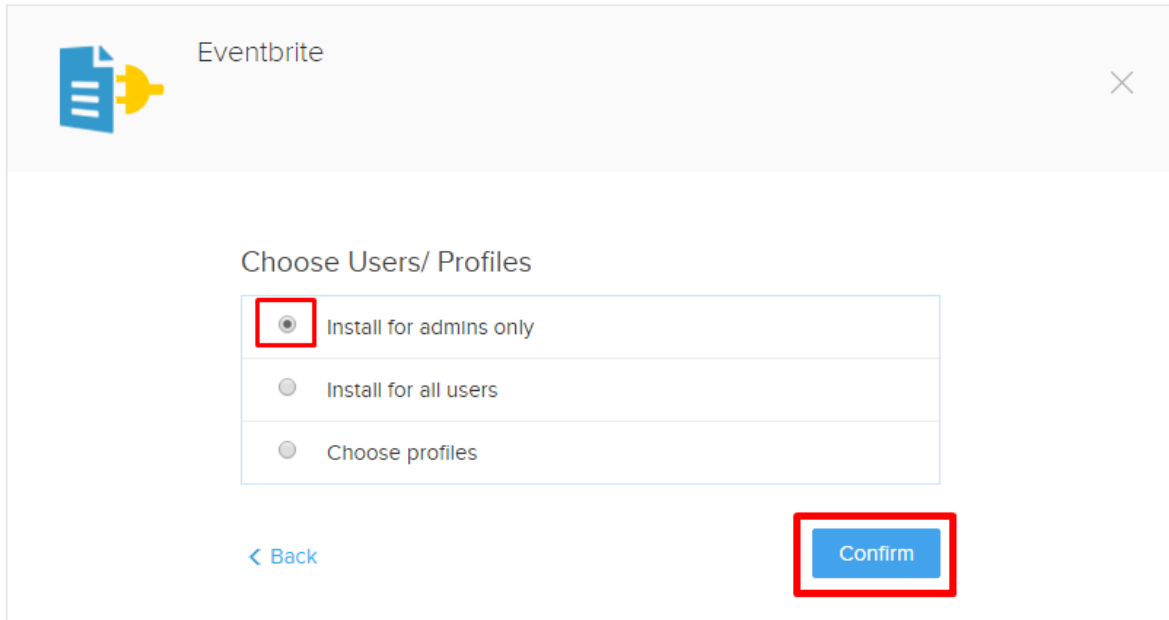

The screenshot shows a dialog box titled "Eventbrite" with a close button (X) in the top right corner. The dialog contains the following elements:

- A question: "Do you want to install the extension shared by projects@techloyce.com?"
- A section titled "Extension Details" containing a table:

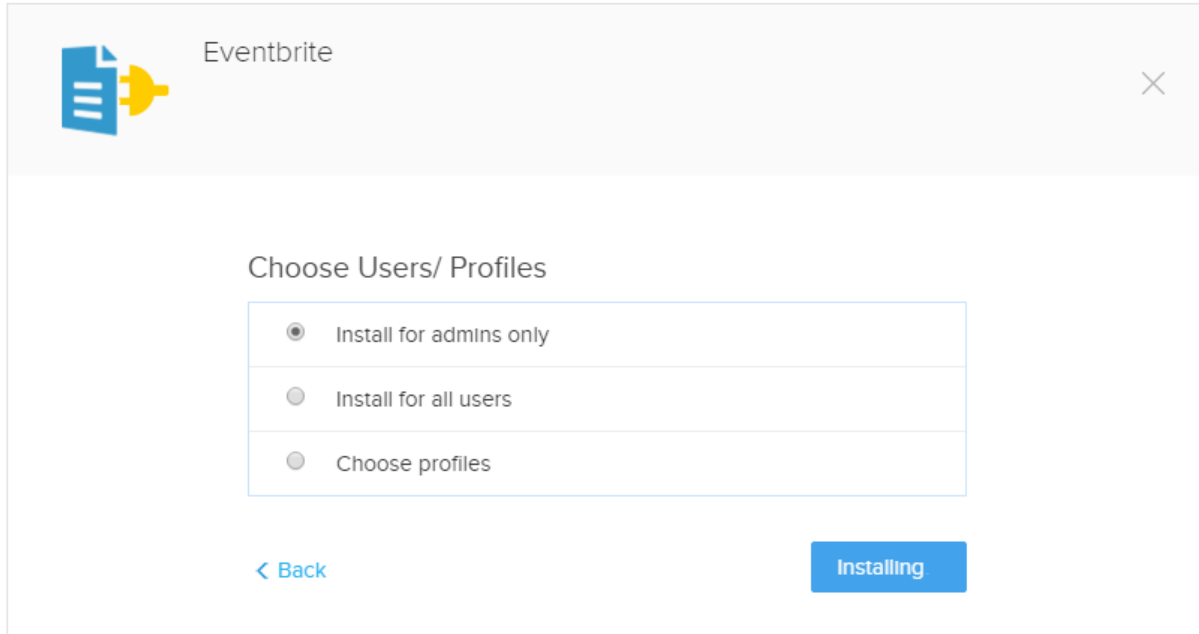

Name	:	Eventbrite
Version	:	
- Two checked checkboxes, each with a red arrow pointing to it:
 - I have agreed to the [Terms of Service](#).
 - I authorize Eventbrite to access and process my data as required.
- A blue "Continue" button highlighted with a red rectangular border.

Check/Mark the Both options and click on **Continue** button

Choose your desire option for app access by users and click on **Confirm** button

After that the app will start to install in your account

On Installation, ZOHO CRM and Eventbrite authentication pop window will appear and you have to allow for both app permissions. If you are not logged in before, a login screen will appear and you have to login first.

eventbrite

eventbrite would like to access the following information.

CRM

- ✓ Manage metadata
- ✓ manage user data
- ✓ Full data access

By clicking the "Accept" button you allow eventbrite to access data in your Zoho account.

Allow test app by techloyce to access your Eventbrite account?

Eventbrite takes privacy very seriously. Before allowing access to your account, please ensure that you trust [techloyce](#) with your data and that you initiated this request.

If you have questions or comments, please [contact us](#).

By proceeding, you agree to the Eventbrite [Terms of Service](#) and [Privacy Policy](#).

Logged in as [faizan.junaid@techloyce.com](#) (not you?).

test app by techloyce

test app for eventbrite with description

After allowing both permissions, your all Eventbrite events and attendees will be synced into Zoho CRM, syncing may take some time.

We displayed an example in the below screenshot you can see, Eventbrite account has 13 events and those all synced in CRM.

The screenshot shows the Eventbrite Events page. At the top, there is a navigation bar with 'eventbrite', 'Events', 'Orders', 'Reports', 'Help', and a user profile icon. Below the navigation bar, the 'Events' section is displayed. A search bar and two filter dropdowns are visible. The filter dropdowns are set to 'Draft (13)' and 'All Events'. The main content area is a table of events. Two events are highlighted with red boxes: 'Prade 7:00am' with 'Has 1 attendee' and 'testdrive' with 'Has 2 attendees'. The table has columns for 'Event' and 'Sold'. The 'Event' column includes the date, a thumbnail image, the event name, and the location. The 'Sold' column shows the number of tickets sold out of the total available. The sidebar on the right contains 'Product Updates' with a list of updates, 'View all recently launched features', and 'Apps for you' with a list of integrations: Hubspot, Mailchimp, Zapier, and SurveyMonkey.

Event	Sold
Sep 10 Prade 7:00am 7:00 PM Has 1 attendee	0 / 10
Sep 10 test drive Hamilton 7:00 PM	0 / 0
